

Celeste Barbier
Tidal Wave

February 14, 2020

Debut EP, Tidal Wave by up & coming vocalist Celeste Barbier will carry you away with her beautiful, haunting & powerful vocals!

HOLLYWOOD, CALIFORNIA - Celeste Barbier's first original song, "Tidal Wave" is already making waves on radio! The song was released to FM radio stations nationwide in January 2020 and within her first 2 weeks she has already climbed the radio charts as #1 Hot AC Most Added, #20 On the Radio Indie Music Charts, made the Radio Top Hot 100 songs and Top 40 National Radio Hits. Her unique voice and fresh arrangements make for quite a spectacular entry as a new artist. Celeste is already doing interviews about this EP as well as discussing future recording projects already in the works.

Celeste has been a professional vocalist in California from Los Angeles to San Diego for the better part of the last decade, performing for various events, weddings, restaurants, resorts and wineries. She has primarily been focused on performing 20th century covers of well known jazz, blues and pop ballads, and has established herself locally as "The Vintage Vocalist."

In the summer of 2019, Celeste was introduced to Grammy Award Winning sound engineer & producer, Bob Tucker, and his co-producer, the award winning composer & accomplished piano prodigy, Jane Getz. They had an instant connection and started working together immediately. Celeste & Getz collaborated in writing Tidal Wave based on a poem Celeste wrote to her wife of 15 years & biggest supporter, Rene Cosby. Getz also wrote unique and fresh arrangements for covers featured of Nina Simone's "Feelin' Good," John Legend's "All Of Me" & Kama Ruby Maccioli & Getz original song, "Envy" to create an EP full of bold potential delivered by Celeste's rich & sultry contralto vocal interpretations.

Between Tucker & Getz, they have worked with quite the list of Who's Who in music ranging from jazz, blues, country, pop and nearly every genre. Tucker, an accomplished guitarist and bassist, is a driving rhythmic force on the album. Tucker has been dubbed one of the "golden ears of music" and helped produce and shape the sounds of albums by Tupac Shakur, The Temptations, India Arie, and for motion picture soundtracks. Getz has toured and played with many legends of the industry from Ringo Starr & John Lennon to The Bee Gees and the list goes on! Her virtuosity on the piano provides an excellent canvas for Celeste's vocal expressions.

Other featured performers on this album include Tom Walsh, who has performed with music legends such Joe Cocker, Tina Turner, Patti LaBelle, Rod Stewart, Michael Buble, and so many more. Don Littleton is considered a master percussionist and was featured on drums for the cover of Celeste's version of "Feelin' Good" and has performed with Roberta Flack among others.

"Celeste Barbier brings an impressive range and dynamic to Tidal Wave. Her performance is emotionally and beautifully articulated. Celeste comes to the studio with a vibrant energy that lights up the session. A consummate professional, a new driving voice in pop radio." - Bob Tucker, Producer & Sound Engineer

"When I first heard Celeste sing I thought she had a beautiful voice, but I wasn't prepared for the degree of artistry and unique talent for phrasing she possessed. I soon found out when I (and Bob Tucker) started to produce her. Every vocal session, I'm blown away not only by her vocal ability, but her expertise in interpreting a song. Give her a listen. You won't be disappointed" -Jane Getz, Composer & Producer

Celeste, along with Getz & Tucker, are already working on their next EP set for a summer 2020 release with 2 original songs composed by Getz & Barbier along with 2 more covers of popular hits both old & new reimagined for a new audience. This EP will feature poetic lyrics coupled with beautiful compositions and highly skilled musicians introducing new guest artists on harp & cello with danceable beats audiences are sure to love.
